## CARE ABOUT YOUR AIR!

Protect the environment and children's health, switch off your engine when parked.

- An idling car generates enough emissions to fill 150 balloons every minute. This can lead to poor local air quality, particularly around schools at drop off and pick up times.
- Children breathe more rapidly than adults absorbing more of these harmful emissions.
- Children are especially vulnerable to the effects of air pollution, which can aggravate conditions such as asthma and can be linked to other lung conditions including respiratory infections.
